Ovens given heat protection - UK

- UK food manufacturer required a safe to touch coating for oven surfaces on site
- Surface temperature was measured at 80-95C

Surface Prep

- All surfaces were mechanically prepared using handheld grinders

Application

- 5 x coats of 561 Thermal Barrier were applied to the oven surfaces
- Over 7mm of coating was applied
- Once cured the surface temperature had been reduced from between 80-95C to below 45C

Project Completion

- The food manufacturer is looking to use the material on other sites
