Marine Repair Kits – GRP pipe repair

601 MARINE REPAIR KIT A   603 MARINE REPAIR KIT C

Resimac GRP Marine Repair Kits have been designed to be used on board vessels and allow the user to perform a wide range of repairs to leaking pipes. The main product contained in each kit is 301 Epoxy Resin and Hardener this is a two component thixotropic solvent free epoxy coating.

The product can be used for injection applications, bonding of dissimilar materials and for use in conjunction with a range of tapes and fabrics to produce high strength composite repairs.

The product can be applied to manually prepared surfaces and is ideal for encapsulating problem pipework ranging from 1"-36" diameter, once cured the system can resist up to 300psi pressure. For injection applications the material can be pumped into voids up to 15mm in depth.

These repair kits are a direct equivalent to ThistleBond Marine Kit A and Marine Kit C.

Typical repairs include....

Sea water lines in an engine room encapsulated using 301 Standard resin and hardener and 100mm wide glass tape. Three wraps of this system onto manually prepared surfaces will resist 75-100psi pressure

Sea water lines corroded externally. Mechanically prepared and then wrapped using 301 standard resin and hardener and glass tape

Accommodation area waste water pipes were leaking at the welded joints. Over 60 bends and joins wrapped using 301 standard resin and hardener and glass tape
